

COACHING SERVICES

Improving Classroom Practice through Coaching

Developmental coaching for classroom practitioners. The coaching we provide is a robust, **personalized learning experience** that supports practitioners to reflect on their practice, clarify their strengths, and target ways in which they can develop further.

Improving Teacher Performance through Coaching

Sometimes, you might need to support a practitioner to move towards particular **performance standards**. If so, we can provide a targeted coaching engagement that focuses on agreed development areas and performance goals.

Enhancing Performance, Development and Wellbeing for Individuals and Teams

Have you ever thought it would be helpful to have a **confidential space** where you can reflect on work and life with someone who will listen but not judge? With someone who can ask questions to **stimulate your thinking** and help you to **sharpen your focus**? If so, we can provide you or your staff with a regular outlet to talk through aspects of work and practice so as to help you find clarity and see your way forward.

Coach Mentoring

Personalized mentoring support for practitioners seeking to develop coaching skills.
